

RAMSES-II

... the ultimate audio cable
if musicality is the main topic

This is what The Others say

Of course for us, and without any doubt, the RAMSES are the best audio cables on the market today. But we are not alone. And perhaps it is more important what other persons say about our cables. Persons who's profession is to test cables and persons who are using our cables in their own system.

Therefore please find following some comments about our RAMSES cables from the hifi-press and also from end users.

RAMSES SC

... It sounds natural, richly colored and has a very high definition. This is a cable for real epicures and a demonstrative proof of the very high standard of its designer. I appreciate its amazing transparency, translucency and realistic image. With this cable you will forge ahead to the highest regions.

RAMSES SC

... Also the finest structures are transmitted without any interaction and are amazingly clean positioned in the scope. From the rocket speedy deep bass it goes on across all frequencies to the point of bright and finest highs. If it fits to your system then it's save to say the matter of speaker cables is definitively finished.

RAMSES SC and RAMSES IC

... These are the least present cables I have ever listened to.

HiFi & records – press

RAMSES SC

... A cable very coherent, self-contained and absolutely free of any quirks. A magnificent cable and without any doubt the ultimate cable for those who take the time to listen and to enjoy.

Stefan Gawlick – end user

RAMSES SC and RAMSES IC

... Liveliness without independent existence, neutrality without abstinence and diversity without confusion – more you cannot ask for. A good cable is not everything but without a good cable everything is nothing. This is really the best combination of cables I ever heard.

Harald Benver – end user

RAMSES SC and RAMSES IC

... Already after a short run-in time the RAMSES cables disclosed their great competence. They sugarcoat nothing, they stress nothing, they omit nothing – they are neutral and honest. In short they transmit nothing but pure music and this in absolutely perfect manner. This great experience will be once more increased if the whole system is connected by RAMSES cables.
